What Is OFiDCrypt's Bouncy Ball of OFiD Fun (EXPB)?

Bouncy Ball (EXPB) is the native utility token of OFiDCrypt, built on **Solana** for fast, low-cost transactions. It powers the **#MicroEconomies** framework, enabling businesses to offer EXPB-based discounts and increase visibility, while empowering consumers with savings.

By pairing digital asset reserves with stablecoins (e.g., USDC), OFiDCrypt promotes secure, incentive-driven adoption focused on sustainable growth and community trust.

EXPB Is Used For:

- Facilitating discounted service transactions (e.g., Giddy's Shop Merchandise and Toys)
 - Building shared business reserves for rewards and incentives
 - Driving visibility through OFiDCrypt's live directory:

What Makes OFiDCrypt Unique?

OFiDCrypt's **#MicroEconomies** framework blends traditional marketing with tokenized commerce to build localized, positive-sum economies. Unlike speculative platforms, this model empowers:

Businesses

- Attract customers with EXPB discounts
- Gain visibility via the live directory
- Build reserves without significant upfront investment

Consumers

- Save on services by swapping USDC for EXPB
- Wallet app automation (coming soon) simplifies crypto for all experience levels

Network

- Viral adoption and network effects benefit small businesses
- Proposed capital gains exemption for EXPB-based purchases reduces tax barriers

Stablecoin backing ensures reliability, making #MicroEconomies a practical and inclusive solution for mainstream adoption.
