PA – PARTNERSHIP ANNOUNCEMENT

Title: $DOBBY & OFiDCrypt – A Liquidity-Focused Partnership for Sustainable Micro-Economies

Presented by: OFiDCrypt

Date: June 7, 2025

Introduction

$DOBBY was minted on Pump.Fun AMM on October 9th, 2024, and has fought back against dips in the market to maintain its upwards trajectory ever since. Known as a powerhouse in fair distribution, growing liquidity, and its strong ethical stance on supporting partner projects through pools via providers such as Raydium, $DOBBY continues to drive forward with sustainable tokenomics and community engagement.

$DOBBY paired in liquidity early following the mint of eXPB Bouncy Ball—leading to multiple community interactions, collaborative efforts on strategy, and promotions to reward new audiences. Together, we fuel the next generation of liquidity-driven digital economies while ensuring responsible growth in Web3 adoption.

Partnership Overview

What does this partnership mean?

- Bridging communities and uniting holders—with $DOBBY standing at more than 3,000 wallet addresses

- Enhancing shared visions for token growth via liquidity incentives, supporting a future of decentralized finance

- Setting new benchmarks for tokenomics—leading the next era of meme-inspired tokens that fuel real business ecosystems

- Targeted promotions through https://eXPB.fun and liquidity allocations benefiting both communities—including those under ONE KIN Community and other pairs

- Tighter integration in social engagement, driving momentum toward a more interconnected Web3 future

With over a dozen liquidity pairs, $DOBBY capitalizes on collaborative growth by identifying strong projects advancing global Web3 adoption. Simultaneously, $DOBBY supports emerging tokens, ensuring scalable expansion through shared liquidity strategies.

Market Performance & Tokenomics

According to DEXScreener:

https://dexscreener.com/solana/mfx2w3yxs5mkw8qnclh4qgzmmlm86trnchzkakl9ywb

The opening daily candle of the new "post-graduation chart"—built on the Pump.Fun bonding curve model and smart contract—hit Raydium only 16 days after launch, on October 25th, 2024.

At the time of this report:

- Market Cap stands at $126,000 USD

- 99.9% of post-graduation liquidity with SOL (WSOL) has been burned, currently valued at 39K—excluding broader liquidity spread across RAY, Kin, ZBCN, and additional key projects

- Liquidity insights, including burned percentages across pools, are publicly available via Raydium.io and Solscan.io

Strengthening Blockchain Transparency & Knowledge Sharing

As trusted LPs with a focus on burns, $DOBBY upholds principles of:

- Commitment to structured liquidity strategies

- Transparency in partnerships and engagements

- Trust through responsible tokenomics and reward-driven adoption

Beyond direct liquidity, $DOBBY aligns itself with the broader ethical vision of blockchain transparency, ensuring financial models support education, collaboration, and open-access data for informed decisions within the digital economy.

Summary

$DOBBY describes itself as:

"Sockless Transactions: No fees, just smooth spells 🪄 💸.
Mischief Mode: Monthly lotteries 🎟️ for magical goodies 🎁.
Magic Wallet: A wizard-worthy 🧙, easy-to-use wallet 💼 🔮."

Their community-focused incentives and giveaways foster knowledge expansion, ensuring accessibility for new audiences exploring Web3 finance.

We see $DOBBY as the "Kings of Liquidity"—though perhaps "Wizards" is more fitting—as their commitment to collaborative growth remains vital for the global adoption of cryptocurrencies.
